

Thesis Maury Kros

Preface

This notebook serves as supplementary material to the master thesis. The goal is to create a complete but brief compilation of the code that is used to recreate the figures and tables that are present in the thesis. In this notebook we cover:

- The plot from section 2
- Recreate the results from section 3. This consists of:
 - The function that is used to run one trial with a choice of design parameters
 - Results in table 1
 - Results in table 2
